Approval of Grip Anti-Slip Treatment

Dear Werner and Thilo,

Further to our meeting at Hilton Worldwide, Maple Court, Watford, I can confirm that we have now trialed your product as supplied and introduced by yourself. As well as the trial in a UK hotel, we have taken references from our hotels across Europe who have successfully used this product as a post production anti-slip surface for our bathroom furniture.

As a result of our research into this product across Europe and our own UK trial, I can confirm that our department, from a health and safety perspective, has approved your GriP AntiSlip product for use on our hotel projects as deemed necessary by our Architecture and Construction team based out of our European Head Office in Watford and as deemed necessary by our Risk Management team based out of the UK. We will now arrange for this product to be listed through our Procurement Department as an approved product and our Procurement Manager will be in touch shortly to discuss the ordering and pricing process, if this has not already been completed.

As soon as this process is complete your product will become available for use across all European hotels as an anti-slip treatment to resolve slipping issues in our hotels and at the bathroom design and construction stage, through your Company.

Thank you for your time in meeting with me and I look forward to working with you again on future projects.

Yours Sincerely

Richard Raeburn
Senior Manager – Safety & Security
UK & Central Europe
